-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Forncrook. Forncrook discloses intermediary support element 19 and boundary element 16 sealingly connected to unlabelled tubesheet disposed therebetween. Regarding claims 12 and 14, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987). Therefore, to employ the device of Forncrook as a FGTT does not structurally limit the claim.

Claims 1-2, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Govers. Govers discloses intermediary support element 10 and boundary element 21 sealingly connected to tubesheet 12 disposed therebetween. Regarding claims 12 and 14, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987). Therefore, to employ the device of Govers as a FGTT does not structurally limit the claim.

Claims 1, 7, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Watson. Regarding claim 7, Figure 3 of Watson discloses intermediary support element 10

Art Unit: 3753

sealing connected to the first vessel interface element 5 (below dashed extension of element 10) and the outer vessel wall component 5 (above extension of element 10). Regarding claims 12 and 14, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Therefore, to employ the device of Watson as a FGTT does not structurally limit the claim.

Claims 1-3, 7, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Mangus. Mangus discloses intermediary support element 16 and boundary element 23 sealingly connected to tubesheet 15 disposed therebetween. Regarding claims 3 and 7, Figure 14 of Mangus discloses outer vessel wall component 69. Regarding claims 12 and 14, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987). Therefore, to employ the device of Mangus as a FGTT does not structurally limit the claim.

Allowable Subject Matter

Claim 4-6, 8-11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

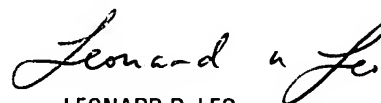

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
